Giant Mastodon EVERBEARING

This wonder berry is nationally known and has stood all tests by commercial growers. A real fancy Everbearing that you will appreciate and admire. No practical grower can afford to overlook Mastodon Everbearing. Profitable crops have proved it a winner. A crop that you can depend on every year. An acre of Mastodon, 8,000 plants, will put more cash in your pockets than 25 acres of ordinary farming. A real opportunity for any farmer or market gardener to realize a daily income. The quickest profits from the least amount of ground. The Everbearing is a real money maker. We hold a United States record, \$2,059.20 from one acre. Think of it! Set and harvest in the same year.

Fruit of the finest flavor, extremely large. The huge size of the berries is truly marvelous. Just like little apples. Nine Strawberries will top a quart box.

The largest berries on record, and the nearest perfect in every way, size, color, sweetness, flavor and hardness. Mastodon has a record of 5,520 quarts per acre. Sure an ideal berry. Easy to sell from its appearance alone. A fancy berry in the truest sense of the word. For a quick money crop, plant the Mastodon this spring, just as early as your ground can be worked. Earlier the better.

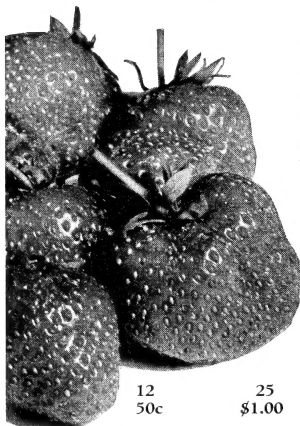

After plants are set out keep off blossoms until July 1st. Then from July 15th you can pick great masses of ripe delicious Strawberries every day till snow flies. Then another big crop in 1943.

Our hardy northern grown plants are the best for all climates. Mastodon and Gem Everbearing have proven the leaders of all everbearing. We can assure you that you will start right with our extra large, certified new ground, fresh dug plants, hand cleaned and tied with red string. Make preparations

right now. Plants very scarce. 20% deposit will book your order. Balance at shipping time. 5% for cash.

The heaviest producing variety in our 25 years of growing Everbearing. Because of its outstanding performance this variety will soon become the leading Everbearing. Be plant wise and order early. Oak Hill's Special

This wonderful berry is handsome in appearance, very large, round and smooth. Beautiful rich red color. Grown on long fruit stems, 8 to 10 inches long, thick as a common slate pencil. Plants grow from 12 to 15 inches high. Particularly valuable for the longest season Strawberry known.

It bears large quantities of the choicest Strawberries for six weeks. Large as a small peach, with Nature at her best. From 350 plants we picked 150 quarts of Strawberries from one picking. Our berries were extra large throughout the berry season. We got 25c per quart; never had enough. Think of it, \$37.50 from one picking; 350 plants.

This is our favorite Strawberry. Extra sweet with two big bites to each berry. They sure are giants, both plant and berries. Hand cleaned plants. Plants tied with purple string.

Premier

How would you like a real early Strawberry? Well, Premier is TOPS. A berry without a fault and with perfect satisfaction wherever grown. One week earlier than any other variety in most localities. The Premier is medium dark, large size, above average; very firm. Solid color, bright and glossy. They are beauties in a quart box. This famous variety is practically frost proof. Under natural conditions over \$1000 can be made from an acre of Premier. This cannot be done from any other farm crop.

A profit-making commercial Strawberry and a world-wide favorite of proven success. Growers know the value of Premier and the consumers demand it. It is a mortgage lifter for any grower. High acre yields and high acre returns. A good early product on the market or on a highway fruit stand. A sure winner. So plant Premier. Plants tied with yellow string. Plant crop only 50%.

Frost King

HOW would you like a real late double duty Strawberry that is frost-proof and bears a full crop every year? This astonishing new variety will mark a new era in growing Strawberries. Especially for the northern growers where late frosts occur and other varieties fail. Frost King is a gold mine at harvest time. We are now convinced that this new variety is the largest and best extra late Strawberry grown.

Frost King was an eye opener to our Strawberry customers at our roadside fruit stand. Each berry looked as if it was varnished. Super large sparkling red choice Strawberries. Around 30 berries filled a quart box. A berry like this will always compel attention. A crate of Frost King is a solid blaze of color. They look very handsome and appetizing. This berry has great quality, is firm for shipping and very sweet and luscious.

It will bear enormous quantities of Strawberries that ripen after all other varieties are gone and continue for a long season. With us they bore until our fall-bearing started. So we have Strawberries from Decoration Day until Thanksgiving. On July 4 we picked \$12.00 worth of berries from 75 plants set the year before.

We grow this variety extensively for market as it is a tremendous bearer.

Regular cropper year after year. Frost King will top them all—quality, color, super size plants, leaves, stems, fruit—and always bring top-notch prices. Because it is off season fruit. Extra late. A real opportunity to make some money. The old saying is, "All that glitters is not gold," but Frost King is as good as gold.

Plant Frost King as they will lead the way to economic independence. Will pay big dividends on low investments. Put your idle acres to work this spring. Our husky new ground plants are all certified by the State of Michigan and Indiana. Plants tied with lavender string.

Just a word to the wise: Order early, as plants of all kinds are very scarce this year.

Our Silver Jubilee

Our 25th Annual Catalog. Way back in 1914 we originated the Champion Everbearing Strawberry. Three years later we broke all records in the United States by picking over \$2000.00 worth of strawberries from one acre. News of my success seemed to spread like wildfire through leading horticulture magazines. Then came the demand for plants, which started us into the nursery business. Now we are known far and wide for our famous strawberries, which bear from May until December; also our melons, flowers, evergreens, famous Aunt Mary's sweet corn, and fruits of all kinds. Anything new, we have it to try out—list only the best and discard the rest. We are not the largest nursery—just a drop in the bucket—but I have had 25 years of sunshine . . . made many fine friends through the orders we sent out, and I know you all by the fine orders you send me year after year. Thanks to those who have recommended me to their friends. Send me your orders as early as you can—just let them roll to Oak Hill Nursery. Our prices are very reasonable, although all stock is very scarce this year due to the unusual season and present conditions. I assure you each and every order shall have my personal attention. Yours truly,

EDW. L. LUBKE.
